About

Hi my name is luka and I am a designer. I live in Britain and love creating nice stuff. I spend almost all my spare time running my blog www.cubebird.org and the rest is spent doing some Photoshopping.

The Top hat icon was inspired by my favourite movie “the prestige”, particularly the scene where tesla is testing his machine on the hat. It took an hour or two to create. I had fun creating it and I hope you have as much fun using it. The icon itself comes in .png versions

Contents

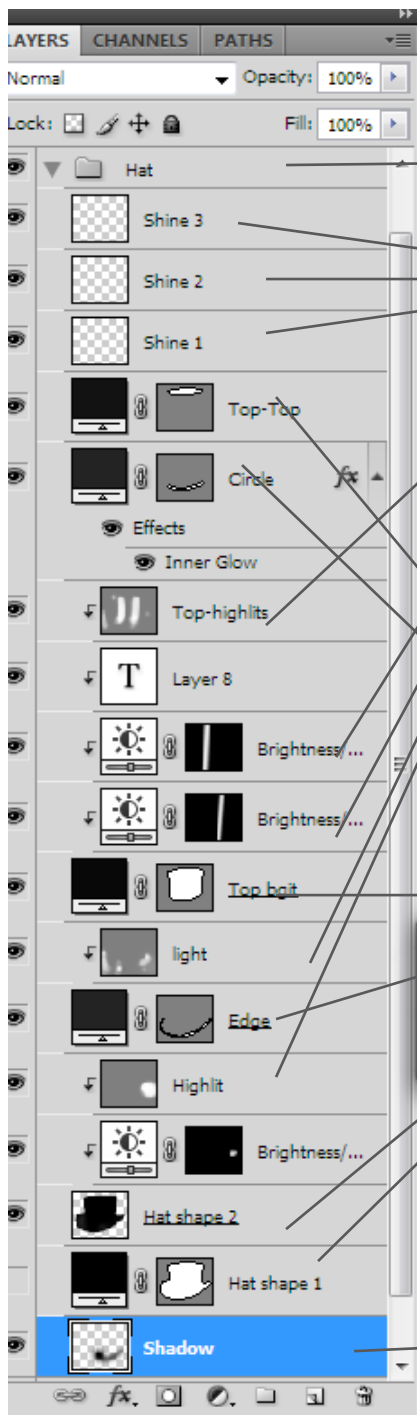

In the **.zip** file you will find the following:

Hat_Icon.psd

PNG: **48x48.png, 64x64.png, 128x128.png, 256x256.png**

File Details

As I said before the file was created in Photoshop. So if you want to edit it the **.PSD** file is the place to go. I used Photoshop CS3, to create the file.

Main folder where the item is placed

The Shine layers and highlight, giving the hat a nice little shine and a realistic feeling

The shape layers define the shape of the hat starting with the overall shape in the beginning and finishing with little details such as the top and the band

A nice little shadow

How to use?

Well this part involves creativity on your end. Well its under creative commons so as long as you give credit and don't resell do whatever you want with it!
